

CANON OFFICE CLOUD

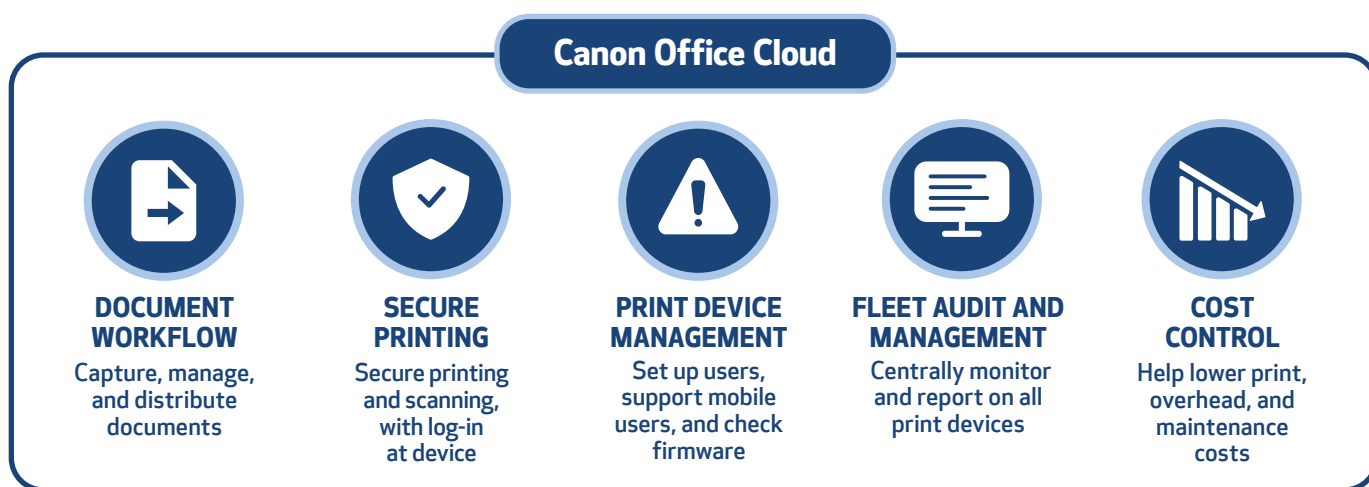

Advanced Cloud
Print Management
Solutions for
**GOVERNMENT
ORGANIZATIONS**

As technology and the needs of government-regulated agencies rapidly evolve, Canon is at the forefront of print management solutions. Canon Office Cloud, a FedRAMP-authorized, cloud-based service platform, offers subscribers centralized control to enhance productivity, help ensure document security, and monitor costs. Including Canon Office Cloud as part of your cloud-transition strategy can help move your organization securely to the new frontier.

Outstanding productivity within a secure environment.

Designed to meet the security needs of government entities, Canon Office Cloud delivers advanced, cloud-based print management solutions that adhere to the FedRAMP standards—the U.S. government’s rigorous security compliance framework for cloud technology.

POWERFUL, CLOUD-BASED SOLUTIONS

An efficient platform for printer fleet management, Canon Office Cloud has been developed to leverage the advantages of the FedRAMP-authorized Microsoft® Azure® Cloud platform. Subscribers can benefit from two services, used either alone or in combination. With next-generation business intelligence and streamlined control, these services help deliver increased productivity and reduced costs.

FOR THE GOVERNMENT SECTOR*

Canon Office Cloud helps government organizations modernize their operations by moving to the cloud. Agencies at all levels—federal, state, local, tribal, and educational—may benefit from Canon’s deep experience in digital transformation and operational know-how.

And organizations subject to government regulations, such as hospitals, health insurance carriers, financial companies, government contractors, and critical infrastructure, can leverage Canon Office Cloud to support their print-related objectives.

GOVERNMENT-APPROVED SECURITY FEATURES

Compliant with the Federal Risk and Authorization Management Program (FedRAMP) and holding a moderate-level ATO, Canon Office Cloud is designed to allow government entities to move their print management systems to the cloud securely, efficiently, and effectively.

FedRAMP-authorized solutions provide a standardized approach to security assessment and authorization of cloud-based services. Adopting a “do once, use many” framework, using a FedRAMP solution can help save the costs, time, effort, and staff needed to vet cloud solutions independently. FedRAMP also assesses agency security and can help ensure that systems are continuously monitored.

All cloud server locations used by Canon Office Cloud are within the U.S.A. All system data remains within U.S. territorial boundaries.

EFFECTIVE COST CONTROL

Working in a cloud-based environment helps reduce the capital and operating expenses associated with on-premise servers, software upgrades, and required personnel. And with the ability to proactively manage print fleet, IT managers have the power to monitor and control print usage from anywhere.

* Eligibility is subject to validation, and access is granted through a formal contracting process. Agencies will need to evaluate the Moderate level authorization with the risks associated with their data.

Print management solutions designed to drive efficiency and safeguard information.

OUTPUT AND SCAN MANAGEMENT

Powered by the award-winning uniFLOW Online, Canon Office Cloud's output and scan management service is designed to help keep printed documents out of the wrong hands, reduce overall printing costs, and improve office productivity.

Scalable and suitable for any size customer, the uniFLOW Online service supports Canon imageRUNNER ADVANCE and imageCLASS devices. It can help save on costs, limit unauthorized access to printed documents, and enable central control of printing and copying.

uniFLOW Online Benefits

- Flexible authentication, including CAC/PIV/SIPR authentication**
- Secure printing of confidential documents
- Tracking of print, scan, and copy costs
- Secure document scanning, including to FedRAMP-authorized cloud services***
- Mobile printing
- Tracking of print, scan, and copy costs
- Mobile printing
- Printing from the cloud

SECURE AUDITING AND FLEET MANAGEMENT

Canon Office Cloud gives you the next-generation business intelligence that will help drive productivity and efficiency across your print fleet. Integrating the powerful solutions of Netaphor SiteAudit™, the service offers advanced auditing and fleet management capabilities.

From a convenient dashboard, proactively monitor asset costs and device problems, usage, contracts, locations, and configurations. Unparalleled device discovery enables users to track asset inventories, device use, automatic supply replenishment, and fleet health.

Using a brand-agnostic approach, Canon Office Cloud's SiteAudit service supports both Canon and non-Canon devices to provide insights and data, regardless of printer type.

SiteAudit Benefits

- Centralized usage reporting
- Print device status and alerting
- Automated toner replenishment
- Automated meter collection tools
- Service-alert notifications
- Inventory change tracking
- Service-performance analysis
- ServiceNow alerts integration
- And more

** CAC/PIV authentication available Q4 2020.

*** Supported Cloud destinations include FedRAMP-authorized versions of Box, Google Drive, and Microsoft OneDrive as shown on the FedRAMP Marketplace.

Canon Office Cloud is at the forefront of cloud-based print management solutions

- FedRAMP authorization (moderate level)
- Reduced administrative and IT burden
- Aids effective fleet and cost management
- Auto toner and appropriate inventory tracking
