

**Returning to the
workplace, Safely.**

We're here to support you.

The Covid-19 pandemic has been the greatest challenge businesses have ever had to face.

At Total Office we have been working to re-shape and adapt our business in order to support our clients. We are working daily with our network of reputable suppliers to deliver reliable, safe products to your workplace.

We understand the concerns that businesses are facing as they try to establish a 'new normal' and bring their colleagues safely back into the workplace, so we're here to support you.

Protective Screens

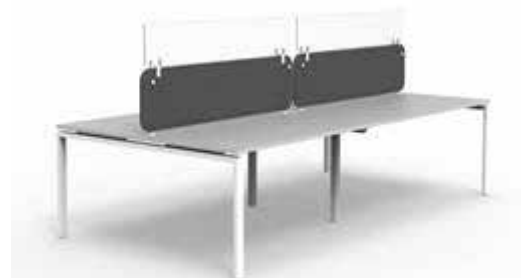

Plexiglass screens can be fitted to desks of all sizes including reception desks. Available with a variety of stable fixings and with a number of optional extras including passing slots. The protective screens ensure that users are separated from each other whilst maintaining visual interaction.

The screens are manufactured from 5mm clear perspex and are versatile, stable and most importantly, easy to clean and maintain.

- 5mm thick 100% transparent Plexiglass screen.
- Perfect fixing.
- Two-clasp support.
- Fast, easy installation.
- Fits to most desks.
- Easy to clean and disinfect.

Panel Boxes

Panel boxes offer desk top protection with added flexibility. All panels are made from 18mm thick white or light grey MFC with impact resistant edging. The back panel comes standard with a clear acrylic or glass vision panel to allow for light and visibility of others.

System benefits:

- Shared back panel for back to back desks
- Shared side panels for side by side desks
- Double depth side panels for back to back desks
- Limited loss of light
- No brackets required
- Cut-out at desk level for cables
- Easy installation
- Easy to clean
- Half the price of Acrylic
- Available in 2-3 weeks from order
- Range of heights
- Special sizes available

Option 1: Corner desk
1600-1800mm wide x 800/1200mm deep x 600-900mm high

Option 2: Bench back to back desking
1200/1400/1600/1800mm wide x 800mm deep x 600-900mm high

Option 3: Single straight or wave desk
1200/1400/1600/1800mm wide x 800mm deep x 600-900mm high

Keeping your workplace safe

In order to safely bring colleagues back into the workplace, businesses will need to enhance their cleaning schedules and provide staff with personal protective wear and equipment to help keep areas and hands sanitised.

The single is designed to be mounted on one side of the of the door. The kit includes: assembly instructions, a set of stickers and cable ties. Simple to mount. Available in 8 colours.

Social Distancing Measures

We know that social distancing will continue to be part of our lives for some time. Maintaining social distancing measures within the workplace is going to be challenging for many businesses, particularly those open to the public. Clear signage and directions will help reinforce social distancing.

Signage and graphics

Informative and directional signage around your business will provide clear guidance and instruction on where users will need to stand, as well as help reinforce messages and provide reminders to users of your building to maintain important hygiene standards. Our signage is available in a variety of formats and materials including vinyl for both flooring and walls.

Tensa Barriers

Providing directional guidance for employees and customers entering your building will play an important part in ensuring safety. Tensa barriers will immediately direct visitors within your business as well as providing an important barrier to keep areas clear.
